

LiftMaster®

LIGHT COMMERCIAL - RESIDENTIAL

SWING GATE OPERATORS

MODEL LA500

**SPECIAL
ON ALL 3 MODELS!**

COMMON KEY FEATURES

- Rated for gates up to 18 feet in length or weighing up to 1,600 lbs
- Gate travel speed at 90° opening in 15-17 seconds
- LED diagnostic display makes it easy-to-read, simplifies installation and troubleshooting
- Security+2.0™ on-board radio receiver accepts up to 50 remotes
- Homelink® compatible for version 4 and higher
- Anti tailgate to prevent unauthorized access
- Wireless dual-gate communication (with second control box for the LA500DCS)
- Simultaneously closes gates
- Bi-part delay: Monitors the speed and position of each wing and adjusts the speed as necessary to ensure primary gate closes last, avoiding potential damage to the gate

LA500XL20W

INCLUDES: LA500DC arm, XL solar control box (XL-SOLARCONTU), universal solar harness (K94-37236), retro reflective photos eyes (LMRRU), battery tray (K10-36183) and two batteries (A12330SGLPK)

FRABA WIRELESS AIR WAVE SWITCH, TRANSMITTER / RECEIVER KIT

CALL FOR PRICING

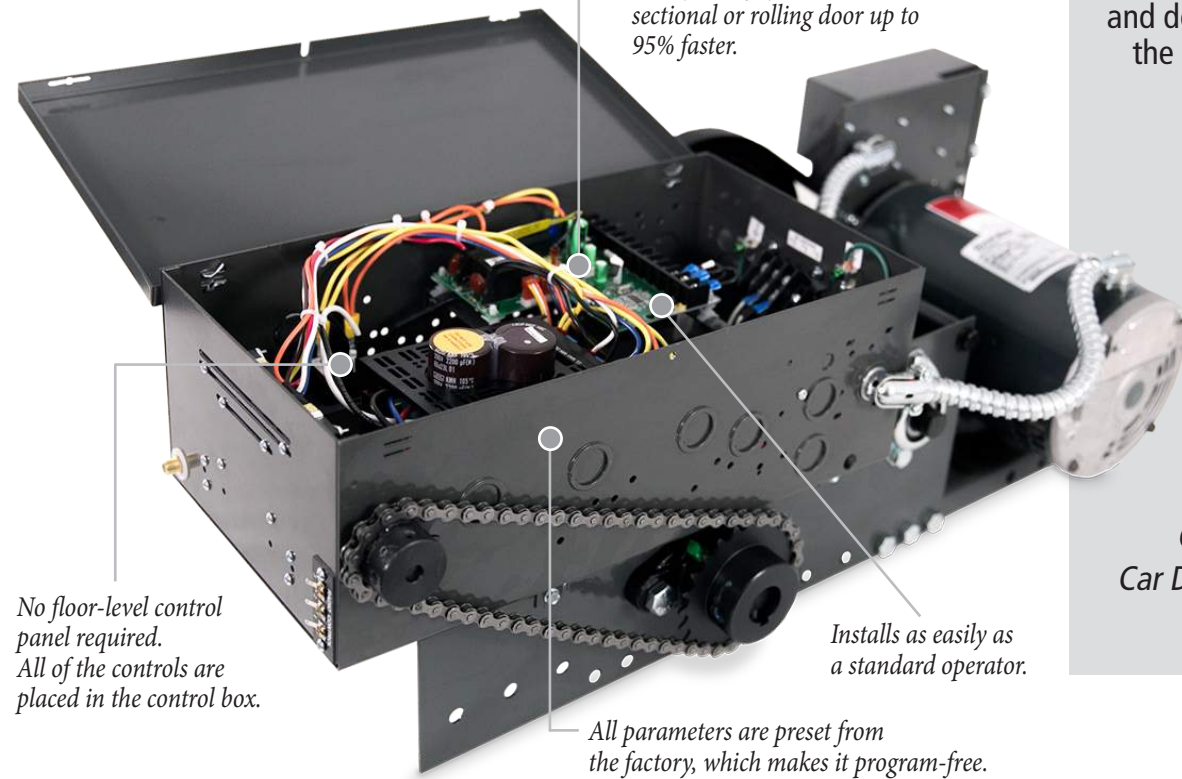

NEW!

FRABA

- The small radio transmitter unit and the pneumatic switch are packaged within the DW3S-200 case while the receiver is built into a Nema 4 case
- It is equipped with a NC or a NO relay
- Kit includes radio transmitter DWTR-200 433MHz and receiver RSW-R 433MHz
- Battery #CR2032 is included DW-RS-200

VFD SERIES

SPEED CONTROL VIA SMOOTHMOVE TECHNOLOGY

No floor-level control panel required. All of the controls are placed in the control box.

Ability to safely run a standard sectional or rolling door up to 95% faster.

Installs as easily as a standard operator.

All parameters are preset from the factory, which makes it program-free.

Extend the life of your operator and door system by allowing the operator to speed up or slow down

Perfect for:

- Fire Stations
- Hospitals
- Carwashes
- Office Buildings
- Industrial Doors
- Parking Garages
- Commercial Doors
- Car Dealership Service Bays

HELP

HARSH ENVIRONMENT LUBRICANT AND PROTECTOR
IDEAL FOR BARNs, SALT SHEDS, CAR WASHES

- ✓ Provides lubrication and protection of all metal surfaces in harsh corrosive environments
- ✓ Coating action lubricates and ensures moisture is displaced and prevents further moisture intrusion
- ✓ Not water soluble - will not dry up or flake
- ✓ Non food grade ✓ 340g aerosol can

MOTION SENSORS & ACCESSORIES

FOR AUTOMATIC PEDESTRIAN DOORS

UNIVERSALLY COMPATIBLE WITH ALL MAKES AND MODELS OF SWINGING, SLIDING AND REVOLVING AUTOMATIC DOORS

3 WEEK SALE

June 11 to 29, 2018

QUANTITIES ARE LIMITED!

PLUS THE OLD LiftMaster SPECIAL PRICING CONTINUES!

FALCON MOTION DETECTOR

- Mounting height between 11.5' and 23'
- Allows uni or bi-directional sensing, and the unique ability to open a door when traffic is moving away from the sensor
- Sensor also has the ability to discriminate between pedestrians and vehicles
- Can be set vertically from 0 to 180 degrees
- 12/24V AC/DC
- All settings are available directly on the unit or via the remote control
- Remote is sold separately BEA-10-FALCON

CALL FOR PRICING

FALCON-XL MOTION DETECTOR

- Mounting height between 6.5' and 11.5'
- Same features as the Falcon detector, but made specifically for extra low mounting
- Allows uni or bi-directional sensing, and the unique ability to open a door when traffic is moving away from the sensor
- Sensor also has the ability to discriminate between pedestrians and vehicles
- Available remote makes it easy to make adjustments to all key parameters of the sensor while at ground level
- Remote is sold separately BEA-10-FALCN-XL

CALL FOR PRICING

INDUSTRIAL SENSOR, DUAL TECHNOLOGY PRESENCE DETECTION

- Combines Microwave Motion Detection with Infrared Presence Detection
- Bidirectional, unidirectional approach and unidirectional depart microwave detection options
- 6 modes of detection filtering and 9 unique infrared patterns for highly flexible presence detection
- Up to 7 minimum object targets
- Adjustable infrared immunity modes to mitigate environmental disturbances
- Can be mounted from 96"-192"
- Designed with NEMA 4 enclosure IS40

CALL FOR PRICING

PRESENCE SENSOR

- Equipped with 9 pre-programmed pattern configurations for various industrial applications
- Various learn time settings allow presence detection to either remain constant or ignore a motionless object after a pre-determined period of time
- Maximum mounting height of 16' and a detection pattern up to 10' X 10'
- Immune to subtle door vibrations, light, sun and environmental changes including rain and snow
- Designed with NEMA 4 enclosure
- Most adjustments can be performed using the BEA remote control IS40P
