

Whiting 1184HD Hold Open

Minimize door damage, increase payload

World Class Quality
Made in the USA.

Reduce Bottom Panel Damage.

Whiting Door introduces the easily installed innovative 1184HD Hold Open Device. With the 1184HD, your truck roll-up door is kept up and out of the way when loading and unloading freight. This device locks the door into place, therefore reducing possible damage to the bottom panel while increasing usable opening height and payload capacity.

This cost-effective system can be ordered for new trailers or retro fitted to existing doors. Contact Whiting or your trailer manufacturer for more details before ordering.

**Prevents
Door Hang
Down**

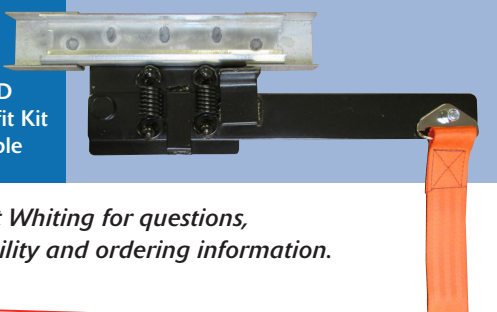

Door is completely out of the opening.

Product Features:

- By locking door into place, bottom panel door damage is greatly reduced
- Increases useable opening height
- Improves operational safety
- E-Coated to prevent rust and corrosion
- This cost effective easily installed device is compatible with most Whiting Premium Door Systems
