MOUNTING & WIRING

Remove the bracket from the sensor. Drill 2 holes accordingly. Mount the bracket firmly.

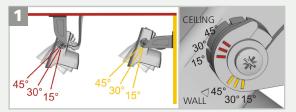

Position the sensor on the bracket and fasten the screws firmly.

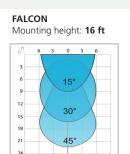

Connect the wires to the door controller. Choose between NO and NC contact.

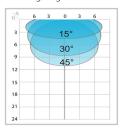

DETECTION FIELD ADJUSTMENTS

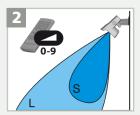

Adjust the angle of the sensor to position the detection field.

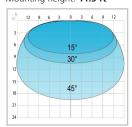

FALCON XL Mounting height: 8 ft

Adjust the field size with the remote control or the push buttons.

FALCON WIDE Mounting height: 11.5 ft

All detection field dimensions were measured in optimal conditions and with field size value 9.

DETECTION FILTER (REJECTION MODE)

Choose the right detection filter for your application with the remote control or the push buttons:

45°

+45°

Detection of all targets
(pedestrians and parallel traffic are detected)

1 = no specific filter

2 = filter against disturbances (recommended in case of vibrations, rain etc.) Detection only of vehicles moving towards the sensor* Value recommendations according to angle and height: 23 ft - 11.5 ft 8 ft Always check if the chosen value is optimal for the application. 4 The object size and nature

can influence the detection.

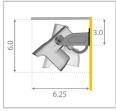

* The vehicle detection filter increases the response time of the sensor.

ACCESS CODE

The access code (1 to 4 digits) is recommended to set sensors installed close to each other.

SAVING AN ACCESS CODE:

Once you have saved an access code, you always need to enter this code to unlock the sensor.

DELETING AN ACCESS CODE:

TROUBLESHOOTING

ERASE AN UNKOWN ACCESS CODE:

If you do not know the access code, **cut and restore the power supply**. During 1 minute, you can erase an unkown access code:
